

- 2 x Ends
- 2 x Sides
- 1 x Bottom
- 3 x Planks
- 1 x Bag of Screws

1. Interlock the sides A-D with the screw holes facing outwards, ensuring you have the screw holes for the bottom facing downwards so that you can screw in the planks (E).
2. Screw together all the sides together as shown then turn planter over and screw the 3 single planks (E) across the bottom.
3. Turn the planter correct way up and slide in the base (F).
4. Note that for bigger planters you may have 4 or more planks to screw in.
